### How Dewey find the books?

The Dewey Decimal System is a way to keep items in order by subject. It helps you find what you are looking for! In this system, books are numbered, from 000 to 999, and every topic has a number. The more specific the topic, the more specific the number. For example, you can find nonfiction books about **dogs** in the **636.7s**.

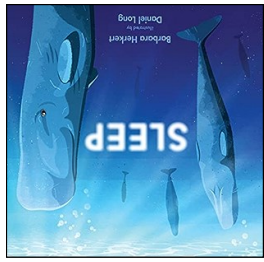

**Can't Get Enough Dog Stuff**  
 By Moira Rose Donohue  
 J 636.7 D68C

**Dogs**  
 By Annabel Griffin  
 J 636.71 G85D

**Why is the bloodhound an excellent tour guide? He nose his way around.**

<b>000-099</b>	general stuff (computers, UFOs, world records, journalism, libraries, things like Bigfoot)
<b>100-199</b>	philosophy & psychology (feelings, self-help, dreams, spooky stuff)
<b>200-299</b>	religion & mythology
<b>300-399</b>	social sciences (family, money, government, voting, holidays, transportation, folk & fairy tales)
<b>400-499</b>	languages (dictionaries, grammar)
<b>500-599</b>	natural sciences (math, plants, weather, dinos, bugs, animals)
<b>600-699</b>	ways to use science (technology, health, cooking, pets, building)
<b>700-799</b>	art & recreation (crafts, fashion, dancing, music, games, sports)
<b>800-899</b>	literature (poetry, plays, jokes)
<b>900-999</b>	geography & history (pirates, flags, presidents, biographies, states, countries, family trees)

 You snooze, you win!

"Every creature needs rest or sleep to thrive. Koalas sleep 20 hours a day. Elephants sleep 2 hours a day. Giraffes sleep only 30 minutes a day! But children need 9.5 hours of sleep. We need to dream to stay healthy. So... Good night!"

Captain Kidd  
By Douglas Florian  
I'm Captain Kidd,  
Me treasure is hid  
In a chest on Gardiners Isle.  
Beneath the ground  
It can be found:  
Gold coins  
(that's why I smile).  
Been buried here  
Fer many a year  
Since 1669.  
So if one day  
It comes your way,  
Remember:  
It's all mine!

Hey! Turn the light out!

"Light pollution leads to falling numbers of fireflies and glowworms. However, light pollution is quite simple to fix—you can help by turning off any lights that you're not using at night! The darker the sky & the more stars you can count, the less light pollution there is."

Why isn't there chocolate-covered gum?  
Try it! "Chew a piece of gum for 30 seconds. Then, place a square of chocolate into your mouth with the gum and chew. What happens? The gum will disappear! Gum is hydrophobic, meaning it repels water. Thus, the gum repels saliva. And that is why it doesn't break down in the mouth. But add chocolate to the mix, and BAM! The cocoa butter's fat mixes with the gum and turns it to liquid. Goodbye, gum!"
