

### Dewey by the numbers

The Dewey Decimal System is a way to keep items in order by subject. It helps you find what you are looking for! In this system, books are numbered, from 000 to 999, and every topic has a number. The more specific the topic, the more specific the number. For example, you can find nonfiction books about butterflies in the 595.78s.

595.78

000-099	general stuff (computers, UFOs, world records, journalism, libraries, things like Bigfoot)
100-199	philosophy & psychology (feelings, self-help, dreams, spooky stuff)
200-299	religion & mythology
300-399	social sciences (family, money, government, voting, holidays, transportation, folk & fairy tales)
400-499	languages (dictionaries, grammar)
500-599	natural sciences (math, plants, weather, dinos, bugs, animals)
600-699	ways to use science (technology, health, cooking, pets, building)
700-799	art & recreation (crafts, fashion, dancing, music, games, sports)
800-899	literature (poetry, plays, jokes)
900-999	geography & history (pirates, flags, presidents, biographies, states, countries, family trees)

### Taxi Crab

*A crabber and a crabby crab  
Sat eating cabbage in a cab  
When suddenly the crabber grabbed  
The cabbage from the crabby crab,  
Which made the crab more crabby still—  
He snipped and snapped his claws until  
The cabbie turned around to blab,  
"No crabbiness inside my cab!  
No crabbiness! No grabbiness!  
No snipping-snapping jabbiness!  
If you two do not curb your rage,  
I'll dump you on the seventh page!"*

As an adult, Nacho whipped up a snack in a restaurant with hot crispy tortillas, cheese and jalapeños. He called them Nacho's Special ... and the rest is history!
