How Dewey find the books?

The Dewey Decimal System is a way to keep items in order by subject. It helps you find what you're looking for! In this system, books are numbered, from 000 to 999, and every topic has a number. The more specific the topic, the more specific the number. For example, you can find books about **feelings** in the **155s**.

155s

I am round and ready. Bursting with hope, crammed with possibilities. I know I must drop and sleep and sprout and grow. So slow! But then, Oak, I'll stretch up my arms, strong and true. I'll be your friend, the one who rises up beside you. Love, Acorn

Ax me anything!

Ötzi the Iceman lived about 5,300 years ago! His mummy was found in 1991 by some tourists in the Italian Alps, frozen in glacier ice. Ötzi had various tools, including a copper-headed ax, a dagger, and a bow and arrow. Scientists have been studying Ötzi (who was murdered!) for clues to his history. They even looked at the food in his stomach: He ate ibex fat!
