Dewey by the numbers
The Dewey Decimal System is a way to keep items in order by subject. It helps you find what you are looking for! In this system, books are numbered from 000 to 999, and every topic has a number. The more specific the topic, the more specific the number. For example, you can find nonfiction books about rocks in the 552s.

Dear Readers,

Hispanic Heritage Month starts Sept. 15. We have lots of great new books to celebrate! And if you liked Coco, you might also like the brand new chapter book Lotería by Karla Arenas Valenti coming out this month. It’s an adventure tale that spins around the traditional game of Lotería, which is a lot like bingo, but with colorful picture cards. Check it out!

by Perry Gripp

It’s raining tacos, from out of the sky. Tacos, no need to ask why. Just open your mouth and close your eyes.

It’s raining tacos!

It’s raining tacos, out in the street.

Tacos, all you can eat.

Lettuce and shells, cheese and meat.

It’s raining tacos!

Yum Yum Yum Yumity Yum!

It’s like a dreeeeeemmmmmmm!!!!!!

Yum Yum Yum Yumity Yum!

Bring your sour cre-e-e-em!

I see! “Eye color depends on the coloring of the eye’s iris and specifically from it containing a pigment called melanin. The iris, like fingerprints, is unique. Its scans are used for identification.”

The rarest eye color is green. Only about 2% of the people on our planet have it.
